How scoring works in Flip 7

- At the end of the round, each player still in play adds up their number cards. The ×2 card doubles that total, then the bonus cards (+2 to +10) are added.
- A player who flips the same number twice busts and scores 0 for the round.
- A player who lines up seven different number cards flips 7: the round ends and they earn a 15-point bonus.
- The game ends after the round in which a player reaches 200 points. The highest total wins.
