How scoring works in Rummy

- Tour de table follows the French rules of Rummy (Rami). When a player lays down their last card, the round ends. Every other player adds up the cards left in their hand and scores that total as penalty points.
- The round winner scores 0. If they laid down their whole hand in a single turn, they score −10 points.
- French Rummy has no single official rulebook. The most common scale: cards from 2 to 10 are worth their face value, face cards 10 points, aces 11 points and jokers 20 points. In some rules the ace is only worth 1 point.
- The game ends when a player reaches 100 points. The lowest total wins.

Tour de table: let the app keep score for you

The app adds up every round, applies the rules of the game and names the winner.
